

REMANUFACTURED

ROTARY SCREW COMPRESSORS

THE FORCE THAT DRIVES
AMERICAN INDUSTRY

GD
GARDNER DENVER™

ALL REMANUFACTURED ROADS LEAD TO **GARDNER DENVER**

Leading the Way

With over 100 years of experience in manufacturing air compressors, Gardner Denver is recognized globally as an industry leader. We set the standard when it comes to quality. Our history, experience and reputation are what set us apart from the competition.

We Go the Extra Mile

Gardner Denver is committed to achieving maximum customer satisfaction through dedicated workmanship, customer service, fast shipments and lean manufacturing.

Reliability is Key

Gardner Denver focuses on the details, providing remanufactured products you can trust. Our remanufactured air compressors are rebuilt to meet strict specifications to ensure the quality and

reliability you've come to expect from a Gardner Denver product. In fact, we are so confident in our remanufactured compressor airends that we offer an industry-leading 5-year extended warranty.

CARRYING ON THE GARDNER DENVER LEGACY

History Of Proven Performance

We have the knowledge and skill needed to deliver the best remanufactured product on the market.

Dedicated Plant, Processes and People

Like everything we've done in our extensive history, Gardner Denver takes remanufacturing seriously. Our Sedalia, Missouri, plant features a 13,000-square-foot area outfitted with experienced technicians who are focused solely on remanufactured products. This dedication of people and space results in remanufactured products that will exceed all of your expectations.

Improvement Through Investment

Investing is key to the long-term success of any business. Gardner Denver is constantly seeking ways to improve the remanufacturing process through investments in equipment, materials and training. By having the entire process in-house, we can better control both the quality and the availability of the final product.

REMANUFACTURING DONE RIGHT

We Don't Believe in Downtime

Market-superior availability is one of the foundations of our remanufacturing business. When your operation is down, our goal is to have the needed product in stock in order to get you back up and running as soon as possible.

Saving without Sacrificing

Gardner Denver remanufactured air ends provide a cost-savings alternative to a new air compressor, without sacrificing the quality or performance you would expect from a new compressor.

Original Equipment Standards

As the original manufacturer of the airend, we know how to get the rebuild right. We know the specifications and clearances needed to maximize the performance of the airend and bring it back in line with the original expectations. Our remanufactured airends go through the same stringent tests as a new airend.

The 20-Point Inspection

When a core is received, it undergoes a thorough 20-point inspection. If there is any question about the condition of a component, it is replaced. Period.

Unmatched Warranty

Given our thorough remanufacturing process, we have the confidence needed to back the product with a standard 2-year warranty and an industry-leading 5-year extended warranty that is backed by the Gardner Denver brand you trust. Unlike many of our competitors, our warranty covers the entire airend — not just the components we replace.
